*Salmonella* is an organism that can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with *Salmonella* often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain beginning 12-72 hours after infection. The illness usually lasts 4-7 days. In rare circumstances, infection with *Salmonella* can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis, and arthritis. People exhibiting any of these symptoms should contact their healthcare providers.

Consumers who have purchased these products are urged not to eat them and may want to contact the retailer or the producer about a refund. Consumers with questions may contact the company at 253-872-0577 Mon-Fri 7a.m. - 11a.m. pacific time.
