4. Prepared by: Bob Flint		Date/Time 11/MAR/09 1900															

1. Incident Name F/V MAR-GUN	2. Operational Period (Date/Time) From: 13MAR09 1000 To: 14MAR09 1000	INCIDENT OBJECTIVES ICS 202-CG
3. Objective(s) <p>Priority of this response is to ensure safety of all responders and the public.</p> <p>Protect environmental, historical and culture sensitivities.</p> <p>Continue to assess vessel stability and stabilize further as appropriate.</p> <p>Modify the vessel recovery plan as necessary to facilitate a safe successful recovery of the vessel.</p> <p>Remove all fuel, persistent oils and HAZMAT from vessel as per established plan.</p> <p>Identify subsistence areas in the trajectory of potential release and develop a sampling plan.</p> <p>SCAT will be in standby to be activated if new oil is observed from the vessel or lightering operations</p> <p>Ensure transparent communication with media, stakeholders and interested parties.</p> <p>Maintain fiscal accountability through the incident. Obtain cost data from responders on a daily basis.</p> <p>Continue to evaluate staffing requirements for Anchorage Incident Command Post and modify as appropriate.</p> <p>Properly handle and dispose of waste generated from the response.</p> <p>Update demobilization plan as needed.</p> <p>Establish a subsistence sampling plan.</p>		
4. Operational Period Command Emphasis (Safety Message, Priorities, Key Decisions/Directions) <p>UC has established this as a dry response (no alcohol consumption by workers while part of this response).</p> <p>Report all injuries, incidents and close calls to the UC through your supervisor.</p> <p>Fatigue issues for workers are of specific concern as the response continues</p> <p>Report any sightings of oiled or impacted wildlife to the UC through the NOAA SSC (Ruth Yender)</p> <p>While in the tidal zone be especially mindful of slips, trips, falls and other water hazards.</p> <p>Workers should advise their supervisor if they need essential supplies i.e. prescription or special needs.</p> <p>Workers are requested to complete daily ICS form 214a and provide them to their supervisor. This is to assist in documentation and to insure work is properly compensated.</p> <p>All media/press releases shall be routed through the UC for approval prior to release.</p> <p>Approved Site Safety Plan Located with: Mark Gregory (St. George), MST2 Hasenauer (Anchorage), MST3 David Simonds (Anchorage) Kyle Watson (Anchorage) Bob Flint (Anchorage)</p>

7. Work Assignments					
<ul style="list-style-type: none"> Apply sorbents to engine room or other areas on the vessel where needed to conduct a safe operation or recover free product. Dewater engine room with discharge water going through a sorbent filter system (fish tote or suitable other tank) Use cold cutting methods to access residual fuel in tanks, limiting penetrations to less than 5" in diameter, and plugging after space is pumped out Consolidate oil to starboard tanks to allow stripping of residual fuel. Continue to characterize vessel stability and general integrity during lightering. Rig discharge hoses for offload of lube oil Offload lube oil into barrels and transfer to Magone vessel for transit to Dutch Harbor via the safest means available utilizing four wheelers with trailers, barrels, and/or pickup with portable tank, ensuring that transfers between containers take place in a containment area Leave ~1000 gallons of diesel in the starboard day tank for generator operation Leave hydraulic oil onboard required for operation of critical equipment (crane, winch, pumps, etc.) Continue offloading double bagged sorbents by highline/skiff to shore and proceed with incineration in smart ash as long as no black smoke is present Offload double bagged pales of useable paint and other hazardous material and transport to the city for their use Facilitate transfer of further offloaded oil to city's 5000 gallon tank, but only after checking in with Ops Section Chief to determine if Hold Harmless Agreement has been signed by City Facilitate transfer of oil already offloaded onto Magone's vessels to the city's 5000 gallon tank via dump truck tank, but only after checking in with Ops Section Chief to determine if Hold Harmless Agreement has been signed by City. Any deviation from the transfer plan discussed in the tactics meeting on 3/12/2009 (transfer from Magone vessel to dump truck tank to city tank) will require authorization from the UC before proceeding. 					
8. Special Instructions					
Measures will be in place to prevent oily water discharge from the dewatering operation.					
When using compressed air follow the safety plan regarding diving operations.					
Do not operate machinery on any beach segment unless cleared by historic properties specialist (Karin Holser)					
All safety incidents, injuries and close calls must be reported to the safety officer and your supervisor.					
Notify Ruth Yender (NOAA SSC) of any impacted wildlife sightings and pollution discharges.

7. Work Assignments				
Burn accumulated oily waste from the response (oiled sorbents, used PPE) in accordance with "Smart Ash" operation procedures and ADEC approval. See waste management plan for detail information. Unusable paint in cans will be taken to the vessels (Makushin Bay or Western Viking) stored according to DOT regulations and transported to Dutch Harbor Garbage will be placed in clear plastic bags and will be stored separately from the oily waste. The garbage will be hauled daily to the Landfill for disposal following the City's procedures.				
8. Special Instructions				
Stop burning if black smoke come from the incinerator				
Follow start up and shut down proceeds for the burner.				
Insure oily material is contained prior to incineration to prevent additional soil or water contamination.
