

BEST MANAGEMENT PRACTICE (BMP) PLAN

APPLICATION FORM

Alaska law prohibits each owner or operator of a small commercial passenger vessels (50 to 249 overnight passengers), from discharging wastewater into Alaska marine waters unless,

- the vessel obtains a discharge permit and meets standard terms and conditions in Alaska Statute¹ or
- the Department approves alternative terms and conditions², which allows operation under a Best Management Practices (BMP) Plan. BMPs include practices that protect the environment to the maximum extent feasible.

This is an application for Department approval to operate under alternative terms and conditions. Owners or operators must apply by submitting this form and the required Best Management Practices Plan for review³ not later than **March 1** of each calendar year, except in a calendar year in which a DEC approved Best Management Practices plan is effective.

If an owner or operator fails to operate in accordance with their Department approved BMP, the vessel discharges must then meet the standard terms and conditions in AS 46.03.463(b).

If you have questions, please contact Ed White (edward.white@alaska.gov) at (907) 465-5138 or Albert Faure (albert.faure@alaska.gov) at (907) 465-5279.
